High

Ed, the applicants have again made changes to the claims that require an additional search for this case (we're negotiating an allowance).

So, would you add the following to my rush search? For 09/966,880, Pls search and interference search:

SID 7: full-length and oligo search (20NTs) against the NT data bases.

Thanks in advance for your great service! Sheridan

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
